---

## PROFESSIONAL SUMMARY

I am a Backend Developer, Statistician, and Tailor driven by building systems and solutions that are practical, scalable, and impactful. I work with Python, Django, Flask, FastAPI, SQL, JavaScript, TypeScript, R, SPSS, and Power BI to develop backend systems and analyze data. I am currently building a **school result management system** and an **e-commerce tailoring backend** while improving my collaboration skills in team environments. I have built tools like a **CSV batch extractor** that processes millions of rows efficiently and an **automated file sorter.** Beyond tech, my tailoring work has strengthened my precision and attention to detail in solving real-world problems.

---

## FEATURED PROJECTS

**1. CSV Batch Extractor** - Command-line tool for high-volume CSV processing

https://github.com/Favour-OE/csv-batch-extractor

- Processes 3,000,000+ rows efficiently without exhausting system memory using chunk-based file streaming
- Supports multiple filtering modes (Exact Match, Case-Insensitive, Contains, Regex) and generates batched output files for Excel compatibility
- Built with Python, Pandas, Regex, and memory-optimization strategies to replace slow manual Excel workflows
- Designed as a lightweight CLI utility with comprehensive logging for automation pipelines

**Smart File Organizer -** Dual-interface file management application with real-time monitoring

https://github.com/Favour-OE/smart-file-organizer

- Supports 40+ file formats with recursive folder processing and real-time folder monitoring (Watch Mode)
- Handles duplicate file naming conflicts automatically; dual GUI (Tkinter) + CLI interfaces for technical and non-technical users
- Packaged as a standalone executable using PyInstaller; fully configurable architecture for easy category expansion
- Developed with Python, OS file system automation, and logging systems

**Text Analysis Tool (Text Analysis & Stock Intelligence API) -** Modular NLP pipeline with REST API and financial data integration

https://github.com/Favour-OE/text-analysis-tool

- Processes unstructured text into structured insights using tokenization, lemmatization, sentiment scoring, and dynamic word-cloud visualizations
- Integrates yFinance API for stock data and BeautifulSoup for news article scraping; exposes all functionality through RESTful API endpoints
- Returns clean JSON responses for seamless integration with frontend or third-party systems
- Built with Python, Flask, NLTK, Pandas, Matplotlib, and Regex

**School Result Management System (Backend)** – In Progress, Secure Django-based backend for academic record management

Private Repository

- Automates student result computation, generation, and retrieval while eliminating manual calculation errors
- Implements role-based authentication (Admin, Teacher, Student) with secure data validation and scalable database schema

• Designed for multi-class environments with efficient querying and reporting capabilities

• Tech stack: Python, Django, MySQL, REST API Development

**E-commerce Backend for Tailoring Company** – In Progress, Custom order management system for fashion production lifecycle

Private Repository

• Streamlines custom tailoring workflows including product listing, order tracking, customer data management, and garment measurement handling

• Supports end-to-end order processing and production lifecycle automation for a physical tailoring business

• Built with scalability in mind for future frontend integration

• Tech stack: Python, Django, SQL, REST API Development

---

**PROFESSIONAL EXPERIENCE**

**Data Scientist & IT Support Staff**

**NGSIRS – Niger State Internal Revenue Service (July 2025 – Present)**

- Deliver IT and technical support for internal data platforms while diagnosing and resolving system, user, and data-related issues for 200+ staff
- Apply analytical thinking and SQL/Power BI skills to identify recurring problems and recommend process improvements
- Collaborate with cross-functional teams to optimize workflows and enhance taxpayer experience through data-driven solutions

**Administrative Secretary**

**AMBASS Engineering and Consulting Service (Sep 2023 – Jan 2024)**

- Coordinated office administrative operations to ensure smooth daily workflow.
- Assisted in meetings by taking minutes, preparing reports, and managing documentation.

- Supported budgeting processes and staff work scheduling to improve operational efficiency

**Administrative Manager**

**Triple D Fashion House (2022 – 2023)**

- Managed operations and supervised tailoring unit; implemented process improvements that increased productivity and customer satisfaction by 80%
- Conducted market research to inform product strategy and operations
- Implemented process improvements that enhanced productivity and customer satisfaction by 80%

**Administrative Secretary**

**Baptist Model School, Kaduna (2018 – 2021)**

- Led transition from manual to digital data entry systems, significantly improving accuracy and efficiency for 45+ staff

---

## EDUCATION

**Bachelor of Technology (B.Tech) in Statistics**
Federal University of Technology, Minna (FUTMINNA) – 2025

**Postgraduate Diploma (PGD) in Project Management**
Chartered Institute of Project Management (CIPM), Ghana – 2025

---

## CERTIFICATIONS

- **Project Management Professional (PMP)**
  American Academy of Project Management (AAPM), USA – 2025
- **Associate, Chartered Institute of Project Management (ACIPM)**
  Chartered Institute of Project Management (CIPM), Ghana – 2025
- **SIMVO Software Development Masterclass** – 2026

---

## CORE SKILLS & COMPETENCIES

- Backend Development:  Python, Django, Flask, REST API Development, Authentication & Authorization
- Database Design (MySQL, SQL)
- Data Science & Statistics: Pandas, SQL, Data Analysis & Visualization (Matplotlib, WordCloud), NLP (NLTK), Statistical Modeling & Forecasting, Large-Scale Data Processing, SPSS, Power BI
- Tools & Methodologies: CLI Development, File Streaming & Memory Optimization, Tkinter GUI , API Integration (yFinance, RESTful endpoints), Web Scraping (BeautifulSoup), PyInstaller Packaging, Logging, Regex, Git
- Project Management: Agile workflows, Stakeholder coordination, Process optimization, Documentation.
